PRO Series Manually PROgrammable Keypads
PRO78, PRO78+, PRO79 and PR79+

**PRO79
PRO79+**

**PRO78
PRO78+**

ProEntry™ keypads feature an on-board, microprocessor-based controller, which eliminates the need for a separate controller or software. Users can be added, changed, or deleted directly at the access control point via the keypad. The simplified design is ideal for smaller installations with a limited number of users and access points and uncomplicated access control management needs.

Hardwired ProEntry™ keypad systems are engineered for compatibility with many electric locking devices. Battery powered ProEntry keypads are compatible with batterypowered cabinet locks available from Locknetics.

IR Security & Safety offers a complete line of PRO products, which provide a wide array of new solutions for your access control needs. These state-of-the-art PROgrammable products offer a package solution that can secure a single door…or an entire building.

Features | Benefits

Features	Benefits
• On-board controller	Reduced installation time
• PRO Keypads – 20 code capacity • PRO+ Keypads – 120 code capacity	Can manage small to medium population of users
• Easily programmed at keypad	Remove old and add new users in seconds
• Weather resistant for interior or exterior applications	Durable, long-lasting units
• Narrow or single gang electrical box applications	Installation flexibility
• Multiple functions available: users, toggle, lockout, one-time use	Access control flexibility
• Anti-tailgate PRO+ keypads	Higher security
• Red and Green LED's	Clear acknowledgment of codes; provides programming guidance
• Available hardwired or battery powered	Installation flexibility
