Schlage Locknetics 620 and 631 Series Pushbuttons offer significant installer friendly innovations: screw terminal connections for the momentary action models, easy to install L2/ILL optional PC board offering backlit illumination for the cone with green and red LEDs for monitoring purposes. Additional options include: Delayed Action, Double Pole Double Throw, Heavy Duty Plate, with several architectural finishes and extreme duty pushbuttons. Alternate Action and Narrow Stile configurations are available. The 620 Series Pushbuttons are available in three sizes: 1-1/4", 1-5/8" Mushroom, in a variety of colors, “Push to Exit”. There are two models of metal 1-1/4" button choice from: aluminum with engraved painted red “PUSH to EXIT” and new red coated aluminum with engraved “PUSH TO EXIT”.

Benefits of Using Locknetics Pushbutton Access And Release Devices

- Easy to install and operate
- Standard and narrow stile plates offer ultimate flexibility
- Multiple button configuration and finish options provide enhanced architectural appeal

Specifications:

701 Pushbutton
Contact Ratings: 5 amps @ 250 VAC
Wire Leads: 20 awg – 6’ long

709 Pushbutton
Contact Ratings: 10 amps @ 250 VAC
Wire Leads: 20 awg – 8’ long

Input requirements with LED option
Voltage: 12/24 VDC
Current Draw: 30 mA
Wire Leads: 24 awg – 6’ long

Input requirements with ILL option
Voltage: 12 VDC for 709 series only
24 VDC for 701/709 series
Schlage Locknetics 740 Series Emergency Break Glass Releases are designed for use as emergency releases of non-designated egress doors such as in individual and partitioned laboratories, secluded testing areas, or other isolated work rooms that are purposely provided with exit doors. In perimeter protection systems that involve the central control of electric locking devices, an on-site emergency release may be required. The “break glass” concept may be preferred over the pull station, because it is less vulnerable to misuse or tamper actuation.

The 740 Series Emergency Break Glass units consist of a replacement Break glass cartridge, that normally holds the plunger-activated switch depressed, until the cartridge lens is broken. When the lens is broken the plunger moves forward and alters the switch contact position. Four replacement lens disks are provided with each assembly. The small hammer is attached to the Break Glass Assembly via a mounting clip along with a 12" chain, to insure it will not detach from the assembly.

**Benefits of Using Locknetics 740 Series Emergency Break Glass Releases**

- Surface mount in a standard 3-gang enclosure
- Compatible with all Fail Safe type electronic locking systems
- An effective alternative to the standard pull box
- Stainless steel standard finish
- Models with LED or audible alarm
- Clearly marked signage indicating purpose of the release
Pushbutton Access and Release Devices
740 Series Emergency Break Glass Releases

How To Order 740 Series Emergency Break Glass Releases

1. Select Model
   - **740**: Includes break glass switch assembly and hammer mounted to a silk-screened 3-gang stainless switch plate
   - **741**: Includes an attached indicator light with red lens
   - **742**: Includes a Sonalert horn for 6-24 VDC operation attached to the plate

Specifications:

- Contact Box Form “Z” switch
- Contact rating: 6A @ 120 VAC
- Normally Open (NO) Normally Closed (NC) contacts with color-coded leads
- LED: 12/24 VDC
- Horn: 3-18 mA
- Input: 6-28 VDC
- Decibels: 80 dB @ 2ft.
