

Both Flat and Radius Faceplates are supplied.

Electrified Deadlatch

For Aluminum Stile Doors

4200 Series eLatch

ANSI/BHMA Type E8231 (Grade 1)

Unique Pivoting Bolt that collapses

Latch Bolt

5/8" x 1" x 5/8" throw. Chrome plated brass.

Auxiliary Bolt

All metal. Deadlocks latch bolt to prevent "loiding" or case-knife entry.

Faceplates

1" x 6-7/8". Both flat and radius faceplates are supplied. Flat faceplates can also be adjusted in the field for right or left beveled edge doors.

Cylinder Backset

31/32" and 1-1/8"

Case

Steel with corrosion-resistant plating. 15/16" x 5-13/16" x depth. (Depth varies by backset. See table on back page.)

Function

The 4200 eLatch combines mechanical locking hardware with electrified access control while working within standard aluminum entrance door preparations. Always operable from the inside via handle or paddle device. Entry via keyed mortise cylinder or access control element. Fail-secure lock with form "C" latch status monitor standard. Rated for continuous operation in either 12 VDC or 24 VDC versions. 1-3/4" minimum door thickness required.

Strikes

Pick from two optional strikes. 4203 no-cut surface mounted strike for ease of installation. Specify 4204 mortised strike for flush mounted installations or when replacing existing 4501/4502/4901/4902 strikes (requires additional preparation). 4204 also available: radius strike for pairs of doors and long lip strikes for thick door and center hung applications.

Operation

Turn key, apply voltage, or operate handle or paddle to release the spring-loaded latch bolt. Electrically rated for continuous duty for timed applications. Interface with access control. Uses any standard mortise cylinder with MS cam (see page SW-33).
